Kitchen Solutions - Accessories

Years of experience, yet still as curious as kids.

At Franke, we have been looking for new solutions and innovations for over 100 years and our attitude still has not changed. In 1911 we combined traditional craftsmanship, precision engineering and a constant pursuit of innovation, three principles that remain at our core.

A story forged in Swiss precision

Our story began at the beginning of the last century as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke. Since then, we opened up to the world and inaugurated manufacturing facilities all around the globe that led us to become leaders in the kitchen sinks segment, and home solutions altogether.

“We believe that sustainability means fairness to future generations”

Shaping our future

Preserving the environment, shaping the future.

As a company conscious of our responsibilities, we think and act today in the interests of the world of tomorrow. We work hand in hand with our partners, customers and suppliers to create a liveable future where people can also thrive.

“We believe that sustainability means fairness to future generations” – this quote from Michael Pieper, owner of the Franke Group encapsulates our company ideals. We reconcile economics and ecology and make a proactive contribution towards sustainable development – with long-lasting products, recyclable materials and smart technologies. We use the global sustainable development goals and the United Nations Global Compact (UNGC) as a guide and framework on the path to a climate-neutral future.

Putting people at the heart of our sustainability

The foundation of our new sustainability strategy rests on the three pillars of the environment, employees and the company. When it comes to environment, we focus on the production and lifecycles of our products.

As the market leader, creating reliable and innovative solutions with real added value is both a challenge and a source of motivation.

This exceptional quality enables customers to use our products for more than two decades – conserving resources in the process.

We also feel an immense responsibility towards our employees, of which there are approximately 8700 around the world. Words like appreciation and trust aren't just empty phrases to us, they're deeply embedded in our company's DNA.

We help people to stay healthy and to make their professional aspirations a reality.

Franke is synonymous with diversity, equal opportunities, cohesion and a company culture where people want to give their best and contribute their own ideas.

Show what you're made of!

Shiny or matte; smooth or stone-like, extra-strong or super trendy. Your kitchen can speak volumes about you, so every detail counts. To offer you the chance to create your very own perfect kitchen, our range of materials is designed to please any taste, match any style and resist any endeavor. Discover each material's precision-engineered character and unique benefits to choose the one that suits your needs

Onyx
Oatmeal
Stone Grey

Fragranite

An exceptionally tough material, highly resistant to burns, dents, chips and stains. Pioneered by Franke, it's a unique material with a subtle sheen that is warm to the touch thanks to its 80% of granite. Also, Fraganite treated with Sanitized® reduces bacteria and microbe growth by 99%. A more than relevant feature for our kitchens, as bacteria can multiply every 20 minutes making the kitchen's surfaces highly unhygienic.

Tectonite

Heat, shock and impact don't scare our Tectonite. Sturdiness combined with unique design freedom makes Tectonite sinks the ultimate choice for hardworking, stylish kitchens. New technology represents a giant leap forward for synthetic materials, whilst allowing for exciting minimalist designs in a new plethora of trendy colours.

Carbon Black

F-Inox Technology

An exclusive Franke coating able to group water molecules and allowing you to dry your sink without ring stains. Water repellent and scratch-resistant, this futuristic coating also fears no heat up to 350°. A real and long-lasting beauty formula that you can appreciate from our Masterpiece family.

Stainless Steel

Whether you prefer the more reflective qualities of the polished finish or the more subtle look of the silk or brushed finishes, which give a more matt sheen, there is a Stainless Steel solution for you. Any Franke Stainless Steel product is made from premium quality chrome nickel steel, which looks stunning and is highly resistant to staining, rust and corrosion - plus it won't chip, craze, flake, or break. If Stainless Steel is one of the most popular materials in the kitchen, it's for good reason.

PVD Coating

PVD, standing for 'Physical Vapor Deposition', is a coating technology that makes tapware even more resistant to abrasions, scratches and corrosion and offers exceptional aesthetic features as well. A tap treated with a PDV coating even resists UV rays and makes fingerprints less visible in a busy kitchen. Available in different finishes, with chrome remaining the most popular, there are now an array of other stunning finishes to choose from. From solid stainless steel, which combines beauty with durability, brass and gunmetal to Industrial Black, Copper and Gold, you really can find something to suit every style of kitchen.

AUSTENITIC STAINLESS STEELS (SS 304 - AUSTENITIC GRADE)

All Franke Stainless steel sinks are manufactured using only SS 304 Austenitic grade. Austenitic stainless steel are chromium & nickel containing stainless steel with very low carbon content. Austenitic 304 stainless steels formed through the generous use of austenitizing elements such as nickel, manganese and nitrogen. Chromium content is range of 18% and nickel content in range of 8%. They are non-magnetic but can become slightly magnetic when cold worked. Cold working also enhances their strength. Austenitic stainless steel have mechanical properties over a wide range of temperatures. In addition, these steel are easy to clean, which enhances their use in applications in hygienic and sterile environments.

Quality in shining armour

Beautiful and made for real-life use. Steel represents our kitchen ideal.

The sheer quality of Franke products can be seen and felt. We use AISI 304 18/8 steel, which is produced in Italy and Europe: a choice that reflects our dedication to quality, one of our core priorities over the 100-plus years of our history.

Strong and robust, it maintains its brilliance over time, making it the defining feature of the living spaces in which it is installed.

Its superb technical features ensure that it is always in demand, and highly appreciated by professionals in the haute cuisine sector: furthermore, stainless steel is an extremely hygienic material, and is easy to clean and recyclable. Aesthetically pleasing and functional to use: stainless steel really represents quality in shining armour.

Durable

The specific concentrations of nickel and chrome in AISI 304 18/8 steel render it particularly resistant to extreme temperatures. Its brilliance does not fade over time; on the contrary, its beauty and appeal only increase.

Easy to maintain

Steel is easy to maintain; just a few simple daily steps ensure that it remains a joy to use over time. Skip to the next page for tips on how to take care of Franke steel.

Functional

Steel is the material of choice for kitchen professionals, due to the fact that it is resistant, hygienic and safe. Its non-porous surface is extremely easy to clean.

Sustainable and ecological

An environmentally friendly material that is 100% recyclable, can be sourced from scrap materials, and produced without toxic waste.

TECHNOLOGY IN STAINLESS STEEL SINKS

A world leader in the production of sinks, Franke offers a unique range of products comprising models at the very pinnacle of functionality and design, complete with various accessories that epitomize practicality and efficiency.

Exclusive treatments: To further improve the quality of the steel, enhance the sheen and increase its resistance to wear, Franke carries out exclusive brushing and polishing treatments. The treatment, applied to hobs and sinks alike, also enhances the visual aspect of each solution.

Years of research and experimentation have allowed Franke to guarantee the use of premium quality raw materials and the creation of excellent finished products in terms of: form and function; ease of use and total safety; water and energy savings with environmental protection in mind.

Only The Best Steel:

Franke collection offers AISI 304 18/8 steel for the manufacture of its sinks. This stainless steel is highly resistant to rust and to the aggressive action of acids and chemical products.

Differentiated Solutions:

Franke offers built-in, under-top and top-flush solutions to satisfy all sink integration requirements while enhancing visual appeal and practicality.

TECHNOLOGY IN STAINLESS STEEL SINKS

Innovative Steel: Franke has always been committed to researching innovative material combining beauty, quality and performance.

Satin Finish Steel: Franke enhances its durable and flexible steel with an exclusive non-scratch satin finish for lasting elegance and practicality.
(Brushed)

Microdecor Steel: Designed to protect from scratches, abrasion and corrosive agents, Franke patented Microdecor finishes create a stunning aluminum effect, enhancing shapes and emphasizing the elegance of each design.

Rules for keeping steel in perfect condition:

Stainless steel is easy to clean and extremely hygienic. In fact, its smooth, non-porous surface makes it difficult for bacteria and micro-organisms to survive. The best way of caring for steel, to keep it bright and shiny and prevent scratches or unsightly marks, is to follow these few simple rules:

- The first time you use it, take extra care when treating and rinsing the surface, to avoid contact with aggressive detergents and prevent ferrous substances in the pipes from being deposited
- Always use cleaning products specifically formulated for stainless steel and do not use detergents containing chlorine, bleach, hydrochloric acid or limescale removal agents
- When cleaning, use soft cloths and not abrasive sponges or metal scourers
- Always rinse thoroughly
- Never leave wet sponges or utensils containing iron on the surface for long periods of time
- Only store containers of detergent or acidic chemical products under the sink once they have been closed

NEPTUNE - Microdecor Finish

Microdecor Finish

The distinctive pattern of Microdecor Steel is so light as to be almost invisible, recalling the effect of aluminum and giving the steel a unique, inimitable appearance. Any scratches only damage the tiny convex areas of the surface, while the imperceptible concave zones prevent the formation of visible marks.

BOX CLASSIC

INSTALL PERFECTION IN A MOMENT

A Red Dot award-winner for best-in-class design, the Box range of sinks helps you get the job done simply and with style.

- Easy to install as a built-in sink, slimtop or undermount
- Premium quality stainless steel. High stain and corrosion resistance

Features:

R12 mm Radius, Free from sludge deposition.

Seamless Rim with Elegant match to counter top.

Suited for Under Mount also

All Franke stainless steel BOX or Square are sound insulated to reduce the sound of water in the bowl. This is achieved by rubber insulation pads under the sink, or by a sprayed dynaphon layer, applied during manufacturing. The grey dynaphon spray also insulates, minimizing heat escaping from the bowl, keeping water warmer for longer.

FRANKE URBAN RANGE FRAGRANITE (Granite Kitchen Sinks)

FRAGRANITE

Following extensive testing and development, new Fraganite tackles the humble cleaning problem associated with composite sinks. The revolutionary new Fraganite+ technology is now available on all Franke Fraganite and Silk Sheen Fraganite sinks, which now enjoy ultra-smooth surfaces that are exceptionally easy to keep clean.

Kitchens can be a fertile breeding ground for bacteria, mold and mildew, which can lead to material damage and cause unpleasant odors and stains. On unprotected material, bacteria levels can increase every 20 minutes. The integrated Sanitized® protective function in Fraganite sinks helps to keep this area clean and provides the sink with lasting protection. It does not replace normal cleaning practices, but helps to keep surfaces clean. Fraganite treated with Sanitized® reduces bacterial odors by 99%. Sanitized® protective function helps to keep sink surfaces clean by reducing the growth of bacterial odors, mold and mildew even between cleaning.

The granite particles bonded together during manufacture are now smaller, creating a smoother, flatter surface, reducing the chances for lime scale to build up. It is also far more difficult for residue, food particles and bacteria to accumulate in between the granules, which greatly improves hygiene.

Tested against leading competitors, DuraKleen® Plus comes up trumps on stain resistance. Even after being left to sit on the sink for 18 hours, the toughest stains like beetroot, permanent marker, red wine and iodine can simply be wiped clean away.

SANITIZED®

With all the foodstuff around in both raw and cooked states and at various stages of the process of cooking, kitchens are an obvious breeding ground for bacteria. Therefore, as an area that's critical to keep clean and bacteria-free, they need special attention to be paid to them.

On unprotected material, bacteria can multiply every 20 minutes and have a seriously adverse effect on hygiene. The possibility of transferring bacteria is also higher on untreated material. Which is why we have designed our Fraganite sinks with an integrated Sanitized® hygiene function. This helps to keep the area clean and provides the sink with lasting protection. It does not replace normal cleaning but helps to keep surfaces free from bacteria. Tests have proven that Fraganite treated with Sanitized® reduces bacteria and microbe growth by as much as 99%.

Sanitized® also helps to keep the sink surface hygienic and protected from bacteria and microbe growth after and in between normal cleaning cycles. So, all in all, you have an almost-bacteria-free washing-up area.

The silver ion locates the bacteria via the moisture and deactivates it.

FRAGRANITE

Staining agent	Ease of cleaning
Coffee	Cold water
Red wine	Cold water
Olive oil	Cold water
Oven cleaner	Cold water
Ketchup	Cold water
Coca-Cola	Cold water
Silver shine	Cold water
Vinegar	Cold water
Bleach	Cold water
Shoe polish	Cif + hot water
Beetroot	Cold water
Saffron	Cold water
Marker	Cif + hot water + 1 min
Mustard	Cif + cold water
Iodine	Cif + hot water + 30sec

MATERIAL CHART

Fragranite / SilkSheen	
Heat	8
Scratch	9
Impact	8
Stain	8
Repair	4
Hygiene	9
Guarantee	10
Total	56

This chart has been developed by Franke to assist in grading the various materials in terms of their performance characteristics for each category.

It is intended to act as a guide for different requirements: 10 points - the best material tested in this performance category. For example, in our tests Fraganite/SilkSheen scores highly in scratch resistance and hygiene.

URBAN SINKS- Fraganite Sanitized Coating Finish

Accessories included

1

Strainer bowl

URBAN RANGE 620- 86 - Fraganite (Sanitized Coating Finish)

UBG 620-86 3 1/2" WWK ND WRO ON (34" x 20")

Finish:	Fun:	Dimension: (LxM)mm	Bowl Size: (LxWxD)mm	MRP: Rs.
Onyx	114.0651.606	860x500	432x425x200 & 341x364x200	26,590/-

KITCHEN FAUCETS

Body Material

Bronze (59%-63%), low lead content (0.8 % - 1.6 %) low residue (<1.5%) – gravity casting or low pressure casting.
Most products in the market are sand cased with lots of pinholes and uneven body thickness.

Electroplating

The thickness of the nickel plating is more than international and European standards and more corrosion resistant than others.

Surface chrome plating thickness for Nickel and Chrome

Franke	Nickel > 7.5u	Chrome >0.25 u
International Standard	Nickel > 5 u	Chrome > 0.1u
EN 817 / EN 200		

Cartridge: German Ceramic Cartridge and Longer Life.

Flexible hose: Spanish S/S 304 exible hose, pressure resistant and corrosion resistant.

Aerator: Using top grade Aerator, integrating water saving and water flow.

Fasteners: All using Stainless Steel.

Disclaimer : Inlet pipes supplied with the product are of standard size, may vary from product to product. Check before purchase if any.

BIO WASTE DISPOSER 0.5 HP/0.75HP/1.25 HP

INTRODUCTION

Franke “Turbo Elite” Waste Disposal Unit is designed to free the kitchen of unsightly and unhygienic household waste and is the essential add-on for ensuring that your kitchen remains looking immaculate.

Thanks to a permanent magnet motor, Franke WDUs reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

Includes integrated Air Switch. Includes antibacterial protection for odour control.

This is a slim line model ideal for fitting into 1.5 bowl sinks where space may be limited.

ADVANTAGES

1. MOTOR

Due to the high speed and torque (twisting power) of the permanent magnet motor, most potential jams are eliminated.

A common problem with induction motors is that they have a starting winding and running winding. When the disposer is used improperly, i.e. food waste being deposited before starting the disposer, it is up to the starting winding to overcome the load on the turntable.

This often results in jamming since the starting winding does not have the torque necessary to overcome many jamming situations.

The Permanent Magnet Motor used in the Bio Shield Series disposer reaches full torque on the initial revolution, therefore avoiding the jamming situations as mentioned above.

TORQUE MASTER

Features Balanced turntables and balances armatures as the heart of the system. This along with corrosion proof components provide for less vibration.

2. BIO SHIELD

A Unique Antimicrobial agent is permanently molded into the “Wet” components that helps prevent bacteria-caused odors.

It also inhibits the growth of a wide range of microorganisms.

3. BUILT-IN AIR SWITCH

This model features a Built-In Air Switch Power Option. Turn on your disposer by the power switch or by pushing a button that creates air pressure to turn on disposer. Great option for use with islands.

4. Corrosion Proof

The Number One cause of failure for our competitors’ disposers is corrosion. Corrosion can cause leaks, jams, and allows bigger food particles through holes enlarged by rusting, which can cause clogging of the drain pipes.

Our all “Turbo Elite Series” models have stainless steel metal grinding chamber parts (turntable, swivel impellers, and the grind ring). This makes the Turbo Elite Series disposer corrosion proof.

The top of Assistance, if ever needed.

A 360° guarantee on the entire family

All of our products are meant to be of the highest quality. That is why it is unlikely you will ever need our Assistance, but if you ever would, we will be there for you in an instant and ready to help. Our exclusive warranty also extends to sinks and mixers in addition to the classic coverage provided on household appliances. An important initiative in the sector that makes after-sale service more and more complete and structured.

Customer Care and Technical Assistance

To report any problems with sinks and mixers with in warranty period please contact Customer Service 1800 209 3484

The first on the line to help you will be our call centre, providing you with advice and instruction to solve the issue. If unsuccessful, we will proceed by sending you directly the easy-fix parts you will need or the Franke Service Centre will be available to solve any technical issue and restore the conformity of the product through a repair or a replacement. Do not worry, we are here to help and your satisfaction comes first.
